

## ***Roundabout reinforced with AS-PE aramid fibers***

On behalf of the municipality of Druten, NTP Group Zevenaar carried out work on the Heemstraweg in Druten. The existing roundabout was milled to a depth of 4 cm and provided with a new surface layer reinforced with AS-PE aramid fibers. The aim was to prevent rutting and cracking caused by heavy truck traffic and to extend the lifespan of the roundabout.

Project information:

Location Roundabout Heemstraweg, Municipality og Druten

Asphalt mix

Dosage 30 kg of AS-PE aramid fibers (500 grams per 1 ton of asphalt)
